

**Omaha, NE** (September 20, 2016) – Direct Patient Logistics (DPL), a division of Air Methods, has partnered with Health eFilings, LLC to offer services that enable their customers to be market leaders. DPL strives to give their customers a competitive advantage, and the PQRS reporting and data analytics services provided by Health eFilings’ proprietary software delivers just that.

“Healthcare is shifting to a value based care model,” said Robert Hopton, CEO Health eFilings. “Our mission is to enable our customers to effectively manage and leverage the data in their EHR so that they can easily comply with CMS reporting requirements to ensure they avoid significant penalties, while also focusing on providing the best quality care at the most cost effective price.”

“We are proud to partner with Health eFilings. As a healthcare service provider, DPL is always looking for ways to assist our hospital partners in becoming more efficient so they can focus on caring for their patients while effectively managing costs,” said Wayne Sensor, President Direct Patient Logistics. “Health eFilings software not only fully automates the compliance process for a healthcare system, but it also provides data analytics to highlight areas that need focus to ultimately improve patient outcomes. That’s the core of our business – improving patient outcomes.”

CMS reporting requirements are extremely complex and non-compliance or compliance errors can result in significant penalties for a healthcare entity. In today’s ever changing world of healthcare and healthcare regulation, it makes sense to partner with a company such as Health eFilings that is an expert in and completely understands all the intricacies of this dynamic environment so that a hospital system can deliver the best possible results. DPL and Health eFilings are dedicated to providing value-added services that remove administrative burdens for healthcare organizations so they can focus on taking care of their patients.

### **About Direct Patient Logistics**

Direct Patient Logistics (DPL), a division of Air Methods is the leader in patient transfer services. DPL was created in 2002 to serve the need of connecting referring facilities with larger network physicians and the communication requirements surrounding patient transports. Today, DPL partners with more than 250 hospitals around the nation from major health systems to community-based hospitals and uses a protocol driven process focused on service with clinical oversight.

### **About Health eFilings**

Health eFilings, LLC is a healthcare IT company that offers software as a service so healthcare providers and organizations can easily comply with CMS reporting requirements for programs such as PQRS, VBM, MU eCQMs and MIPS. Our cloud based software fully automates the compliance process without needing any IT support or requiring any workflow changes, which saves our customers significant time and money. Our turn key, end-to-end service extracts data from any MU2 compliant EHR to ensure our customers avoid substantial penalties and are well positioned to earn incentives. As a data submission vendor, we are fully HIPAA compliant, and our proprietary software is an ONC Certified HIT. Our service also enables providers to leverage the data in their EHR to successfully meet their quality goals associated with any population health management initiative by providing the analytic tools to improve patient outcomes and quality of care.
